End: 12/12/18

No Class: 9/26, 10/17, 11/21

Cost: \$210/12 weeks

Join the Fun!

Brainy Builders is a creative Lego and K'nex program aligned with National and Georgia Education Performance standards. Brainy Builders kids learn by building! Utilizing Lego and K'nex Education kits, the materials and guided activities encourage critical thinking, problem solving, team building, collaboration, and important motor skill development, all while having fun. Students learn about levers, gears, wheels, axels, pulleys- all the components of basic machines and mechanisms (motorized and non-motorized) while exploring energy, balance and buoyancy. Through our themed building curriculum, students will develop skills within science, technology, engineering, mathematics, as well as language arts and literacy. Every new project features thought-provoking themes including, outer space, transportation, traveling, and community. For our advanced builders, projects involve construction and software programming providing movement to their Lego models while learning logic, sequencing and problem solving.
